

ECO STEP ADHESIVE

THE NEW EVOLUTION OF GLUE IS HERE

ECO Step is an advanced formula, combining a unique 4-in-1-polymer adhesive developed with the professional timber floor installer in mind.

It offers more features in the one process than most adhesives on the market, replacing the need for multiple products, such as a moisture barrier, ply sheeting and acoustic matting when installing a floor.

It is a no nonsense environmentally friendly product with no solvents or VOC's and offers exceptional heat and cold tolerances (-40° to + 90°). It meets and can even well exceed Australian standards for sound and impact noise control 62Db (any void less cavities, test results may be required) and lastly it has a timber flex agent allowing the flooring to expand and contract.

The unique bladder package see a more efficient dispense with less product loss after opening making for a cost effective alternative to its nearest competitors and offers a superior flex - agent and moisture-retarding capability.
